[illegible]

The diagrams illustrate the components and types of a mist bar:

- Mist Bar:** A horizontal bar with a circular mist nozzle on the left, a central section with seven 'X' marks representing mist holes, and a curved mist deflector on the right.
- Mist Bar Types:** Three variations of the mist bar are shown below, each with a circular mist nozzle on the left and a horizontal bar on the right. The first type has a single horizontal bar. The second type has a single horizontal bar with a small gap. The third type has a single horizontal bar with a small gap and a small circular mist nozzle on the right.
